📍 Toronto, ON, Canada ✉ meraichaitali1912@yahoo.com ☎ (+1) 437-971-9758 🌐 /in-chaitali-merai 📁 View Portfolio

Professional Summary

Senior Frontend Developer with **7+ years of experience** specializing in architecting and delivering high-performance, scalable web applications. Expert in **React 18**, **Next.js**, and **TypeScript**, with a deep focus on **Frontend Architecture**, including **Micro-Frontends**, **Design Systems**, and **State Management**. Proven track record in translating complex requirements into pixel-perfect, accessible UIs using **Tailwind CSS**, **SCSS**, and **Material UI (React/Angular)**. Adept at leading the full **Software Development Lifecycle (SDLC)**, implementing **CI/CD pipelines via GitHub Actions/AWS**, and mentoring cross-functional teams. Passionate about **Performance Optimization**, **Core Web Vitals**, and solving complex architectural challenges through advanced **Data Structures and Algorithms**.

Technical Skills

Front-End Technologies: React js, Next js, Angular (v18+), JavaScript(ES6+), TypeScript, PHP, jQuery, HTML5, CSS3 (Flexbox/Grid), Tailwind CSS, SCSS/SASS, Bootstrap, Material UI(React/Angular)

Backend Technologies: SQL Server, MySQL, MongoDB, PHP (OOP), WordPress, GraphQL, REST APIs, MVC

UI/UX Design: Figma, Adobe XD, Photoshop, Material UI, Styled Components

Cloud Technologies: AWS (EC2, S3, RDS), Azure (DevOps, CI/CD), GitHub Actions, Firebase

DSA & Algorithms: Advanced Data Structures, Sorting (Merge/Quick/Heap), Searching (Binary, BFS, DFS), Graphs, Trees, Dynamic Programming.

Testing & QA: Jest, Cypress, JUnit, TDD (Test-Driven Development), Unit Testing, Debugging.

Methodologies: Agile (Scrum), TDD, Performance Optimization, Code Reviews, Caching Strategies

Development Tools: Git, GitHub, Visual Studio, VS Code, Postman, JIRA, Storybook

Compliance & Integrations: WCAG 2.1 (Accessibility), SEO, Google Analytics, Stripe, PayPal Integration

Professional Experience

Software Developer (Freelance) | Zestbrains Pvt. Ltd

Mar 2023 – Present

- Architected and delivered 5+ high-performance web applications in the eCommerce and SaaS sectors using React 18 and Next.js, implementing Tailwind CSS for rapid, utility-first UI development and optimized Core Web Vitals.
- Engineered complex frontend logic and responsive layouts using HTML5 and CSS3 (Flexbox/Grid), utilizing advanced React patterns to manage sophisticated filtering, global search, and pagination.
- Implemented secure, scalable Authentication & Authorization systems using Firebase Auth and JWT, designing custom middleware and token-refresh strategies for multi-tenant architectures.
- Established CI/CD workflows using GitHub Actions and AWS (S3/CloudFront), reducing deployment cycles and ensuring 99.9% uptime for client applications.
- Orchestrated Agile delivery by leading technical demos for international stakeholders, translating Figma/Adobe XD wireframes into pixel-perfect, scalable frontend system designs.

Senior Software Developer | Green Apex Technolabs, India

Sept 2021 – Feb 2023

- Led development of Yup.gg, integrating social APIs (Instagram, Facebook, Twitch, Twitter) using queue-based data structures for efficient feed processing and updates.
- Pioneered a Micro-Frontend migration using Webpack Module Federation, successfully breaking down monolithic codebases into independent modules, increasing team velocity by 40%.
- Developed a centralized UI Component Library using React, Storybook, and Tailwind CSS, ensuring brand consistency and WCAG 2.1 accessibility compliance across multiple product lines.
- Optimized application performance through strategic implementation of Memoization (useMemo, useCallback) and SCSS architecture, resulting in a 35% reduction in initial bundle size and style redundancy.
- Managed complex state transitions using Zustand and React Context API, while integrating Material UI (MUI) to maintain high-quality, professional user interfaces.
- Enforced strict Type Safety and design consistency by establishing TypeScript best practices and standardized HTML5/CSS3 coding patterns across the engineering team.

Senior Web Developer | Zestbrains Pvt. Ltd, India

Jan 2020 – Aug 2021

- Developed and maintained 10+ full-stack web applications for clients in retail, healthcare, education, and logistics, using Angular, React.js, and Bootstrap.

- Led the full-stack development of 10+ enterprise-grade SPAs using React and Angular, leveraging Angular Material and Bootstrap to deliver robust, modular service layers.
- Spearheaded the refactoring of legacy jQuery/PHP interfaces into modern, hook-based React components and SCSS modules, improving maintainability and developer experience.
- Implemented "Atomic Design" principles using Material UI, creating a highly modular ecosystem of reusable components and custom directives that reduced UI code redundancy by 30%.
- Integrated complex 3rd-party APIs and Payment Gateways (Stripe, PayPal), ensuring secure transaction flows and building responsive payment dashboards with Bootstrap and CSS3.
- Mentored a team of 5 junior developers, conducting code reviews and teaching modern styling techniques including SASS/SCSS, mobile-first design, and Git-flow strategies.

Frontend Developer | Jellynut Technology, India

June 2014 – Dec 2019

- Developed interactive, user-centric UIs using React and Material UI, focusing on responsive design, cross-browser compatibility, and W3C standards.
- Engineered gamified Ed-Tech platforms, including Reading Detective, Math Detective, and Science Detective, utilizing JavaScript and Cocos2dx to implement complex logic for tiered difficulty levels (Beginning, A1, B1).
- Architected modular game components and interactive learning modules, ensuring seamless state management and asset loading for high-traffic educational tools.
- Standardized frontend styling by transitioning from vanilla CSS to SCSS, implementing design tokens, variables, and mixins for streamlined theme management across all "Detective" series projects.
- Leveraged Firebase services for real-time features, including push notifications and cloud messaging, while ensuring consistent UI feedback with Bootstrap components.
- Applied advanced HTML5 and CSS3 to create immersive, accessible interfaces, maintaining strict adherence to mobile-first design principles for young learners.

Projects

LocalCare – Doctor Listing Platform • [Doctor Listing App](#)

React js and Next.js doctor directory with category/location filters, SEO optimization, and AODA-compliant UI

Indian Basket – Online Grocery Store • [indianbasket.rf.gd](#)

Built PHP & MySQL-based eCommerce grocery store with Stripe Checkout, admin panel, dynamic invoice PDF, and full order management system

Green Apex Corporate Website • [green-apex.com](#)

Corporate website using React + Headless CMS, deployed via AWS (EC2, S3, CloudFront)

Loktej – Gujarati News Portal • [loktej.com](#)

Multilingual news site built with WordPress, PHP, and MySQL. Developed custom themes/plugins, integrated RSS & social sharing, and optimized performance with lazy loading and caching. Enabled admin-friendly content publishing by category.

Education

Web Development | Conestoga College, kitchener, ON Canada | GPA - 3.36/4

Jan 2024 – Apr 2025

Bachelor of Computer Application (BCA) | CASPS College, India

Jan 2011 – Apr 2014

Open Work Permit Holder – Eligible to work in Canada without sponsorship
