📍 Toronto, ON, Canada ✉ meraichaitali1912@yahoo.com ☎ (+1) 437-971-9758 🌐 /in-chaitali-merai 📁 View Portfolio

Professional Summary

Senior Frontend Developer with **7 years of experience** specializing in architecting and delivering high-performance, enterprise-grade web applications. Expert in **Angular (v10+)**, **TypeScript**, and **RxJS**, with a deep focus on **Frontend Architecture**, including **Micro-Frontends**, **State Management (NgRx/RxJS)**, and **Reactive Design**. Proven track record in translating complex requirements into pixel-perfect, accessible UIs using **Tailwind CSS**, **SCSS**, and **Angular Material**. Adept at leading the full **Software Development Lifecycle (SDLC)**, implementing **CI/CD pipelines via GitHub Actions/AWS**, and mentoring cross-functional teams in **Angular CLI** best practices. Passionate about **Performance Optimization (OnPush/Signals)**, **Core Web Vitals**, and solving complex architectural challenges through advanced **Data Structures and Algorithms**.

Technical Skills

Front-End Technologies: Angular (v10+), JavaScript(ES6+), React js, Next js, TypeScript, PHP, jQuery, HTML5, CSS3 (Flexbox/Grid), Tailwind CSS, SCSS/SASS, Bootstrap, Material UI(React & Angular)

Backend Technologies: SQL Server, MySQL, MongoDB, PHP (OOP), GraphQL, REST APIs, MVC

UI/UX Design: Figma, Adobe XD, Photoshop, Material UI, Styled Components

Cloud Technologies: AWS (EC2, S3, RDS), Azure (DevOps, CI/CD), GitHub Actions, Firebase

DSA & Algorithms: Advanced Data Structures, Sorting (Merge/Quick/Heap), Searching (Binary, BFS, DFS), Graphs, Trees, Dynamic Programming.

Testing & QA: Jest, Cypress, JUnit, TDD (Test-Driven Development), Unit Testing, Debugging.

Methodologies: Docker, AWS, Agile (Scrum), TDD, Performance Optimization, Code Reviews, Caching Strategies

Development Tools: Git, GitHub, Visual Studio, VS Code, Postman, JIRA, Storybook

Compliance & Integrations: WCAG 2.1 (Accessibility), SEO, Google Analytics, Stripe, PayPal Integration

Professional Experience

UI Developer | Sunlife, Canada

June 2025 – Current

- Modernized legacy insurance modules by migrating to Angular 10, leveraging RxJS and highly decoupled NgModules to enhance application reactivity and architectural maintainability.
- Designed complex reactive forms with RxJS for wealth management tools, implementing custom validators and asynchronous data handling to ensure 100% data accuracy before API submission.
- Architected Micro-Frontend solutions using Webpack Module Federation, enabling the seamless integration of Angular-based micro-apps into the broader Sun Life digital ecosystem.
- Engineered dynamic, high-performance financial interfaces using React and Next.js, leveraging Server Components and Hooks to optimize data fetching and rendering for client-facing portals.
- Implemented robust state management using Redux Toolkit and React Query, ensuring real-time synchronization of complex insurance policy data across multi-page user workflows.
- Developed modular UI patterns with Tailwind CSS and Headless UI, focusing on creating flexible, themeable components that adhered to strict enterprise design system requirements.

Senior Software Engineer | Green Apex Technolabs, India

Sept 2021 – Feb 2023

- Led development of Yup.gg, utilizing RxJS Observables and Operators for real-time social API integration (Twitch, Twitter, etc.) and efficient feed processing.
- Pioneered a Micro-Frontend migration using Webpack Module Federation, successfully integrating Angular and React micro-apps into a unified host portal, increasing deployment flexibility by 40%.
- Developed a centralized UI Library based on Angular Material and Tailwind CSS, enforcing WCAG 2.1 accessibility compliance and brand consistency across diverse business units.
- Optimized application performance through OnPush Change Detection, tree-shaking, and SCSS modularization, resulting in a 35% improvement in Initial Page Load times.
- Managed complex state using Services with RxJS BehaviorSubjects, ensuring type-safe data flow and reducing production runtime errors through strict TypeScript patterns.

Senior Web Developer | Zestbrains Pvt. Ltd, India**Jan 2020 – Dec 2020**

- Led full-stack development of 10+ enterprise SPAs for retail and healthcare clients, utilizing Angular Reactive Forms for complex data entry and validation logic.
- Spearheaded the migration of legacy jQuery/PHP interfaces into modern Angular components, implementing Service-based architectures to decouple business logic from the UI.
- Applied Atomic Design principles using Angular Material, creating a highly modular ecosystem of reusable directives, pipes, and components that reduced UI code redundancy by 30%.
- Integrated secure 3rd-party payment gateways (Stripe, PayPal) and built responsive dashboards using Bootstrap and CSS3 Flexbox/Grid.
- Mentored a team of 5 junior developers in Angular CLI best practices, RxJS patterns, and Git-flow branching strategies to ensure high-quality code delivery.

Web Designer(Internship) | 1Rivet, India**June 2019 – Nov 2019**

- Designed and developed user-centric interfaces using React, Material UI, and Styled Components.
- Actively participated in training sessions to enhance technical skills and stay updated with emerging technologies.
- I learned SCSS and Web Designing concept, professionals, and standards I actively took part in training sessions and workshops to enhance my skills.
- Wrote, evaluated, and debugged React code using various frameworks and libraries like Material UI, Semantic UI React, Styled components, React Hook Form, Prettier, Ant-design, and React Spinner.

Frontend Developer | Jellynut Technology, India**June 2014 – Apr 2019**

- Developed **user-centric interfaces** using Angular, React, Material UI, and Styled Components.
- Engineered gamified Ed-Tech platforms, including Reading Detective, Math Detective, and Science Detective, using JavaScript and Cocos2dx to implement multi-level game logic (Beginning, A1, B1).
- Architected modular UI components and interactive learning modules, ensuring seamless state management and asset loading for high-traffic educational tools.
- Standardized frontend styling by transitioning to SCSS, implementing design tokens and variables for streamlined theme management across the Detective series.
- Developed interactive user interfaces using React and Material UI, maintaining strict adherence to W3C standards and cross-browser compatibility.
- Leveraged Firebase services for real-time notifications and synchronized data states, while ensuring accessible UI design for young learners via HTML5 and CSS3.

Projects**LocalCare – Doctor Listing Platform • [Doctor Listing App](#)**

Angular js doctor directory with category/location filters, SEO optimization, and AODA-compliant UI

Indian Basket – Online Grocery Store • [indianbasket.rf.gd](#)

Built PHP & MySQL-based eCommerce grocery store with Stripe Checkout, admin panel, dynamic invoice PDF, and full order management system

Green Apex Corporate Website • [green-apex.com](#)

Corporate website using React + Headless CMS, deployed via AWS (EC2, S3, CloudFront)

Loktej – Gujarati News Portal • [loktej.com](#)

Multilingual news site built with WordPress, PHP, and MySQL. Developed custom themes/plugins, integrated RSS & social sharing, and optimized performance with lazy loading and caching. Enabled admin-friendly content publishing by category.

Education**Web Development (Associate Degree) | Conestoga College, kitchener, Canada****Jan 2024 – Apr 2025****Bachelor of Computer Application (Bachelor Degree) | CASPS College, India****Jan 2011 – Apr 2014****Open Work Permit Holder – Eligible to work in Canada without sponsorship**
